HOBBIES

Music

Tennis

MUNing

MINOR PROJECT

Optical Character Recognition

Our OCR is built with Python and Pytorch deep learning library The detection part is using the CRAFT algorithm and the Recognition model is CRNN. It is composed of 3 main components, feature extraction (we are currently using Resnet), sequence labelling (LSTM) and decoding (CTC).

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya

2018 - Studying

Bachelor of Technology (BTECH), Computer Science with Big Data Technologies partnered with IBM

Choithram school

2018 - Graduated with High School Diploma

+1 & +2 with physics chemistry and math as major

WORK EXPERIENCE

Intugine Technologies

Software Intern

Aug. 2020 – Present

In the starting month of my internship, I learned all the basics and advance concept in Front End Development. My job was to style the front-end components (React js, Angular, Vue) that meet the requirement of users and clients. After that I also got my knowledge on backend APIs in which I learned Node js, express mongo db. I created a Ticketing page for customer executive client interaction with a chat box, here clients could create tickets for queries and problem. I also got to know the background of technologies like AWS and mongo DB.
